

ABOUT US

In 2010, Professor Barzel Heisenberg and his student Ms. Stephanie Shi established Dasgute Chem in Wuxi, China. The company started from manufacturing silicone and softener flake, now becomes to be a group engaging in textile auxiliaries production, research and marketing.

Hongkong branch and North China Yantai branch were founded to expand and strengthen our international and domestic market. Now Dasgute own a high efficient marketing network all over the world in China, Bangladesh, Pakistan, India, Vietnam, Malaysia, Turkey, Egypt, Iran, Brazil, etc.

Dasgute technical center has equipped the world first class equipments and devices which are capable to do chemical research, auxiliary analysis, fabric test and hazardous material detection. We guarantee all chemicals come from Dasgute are environmental friendly. Our technical team are keeping close communications with the professional institutes in China, such as Donghua University, Jiangnan University, National Dyeing and Finishing Technical Project Center, Shanghai Textile Science Research Institute, etc.

Dasgute strictly control the product quality and environmental management under the system of ISO9001 and ISO14001. Under the increasing demand of certification support in international market, we are starting to apply for GOTS, ECO-PASSPORT, BLUESIGN regularly. We plan to complete in the near future that all the main selling products have got at least one certification above.

Dasgute success due to the high efficient management, swift operation, correct attitude, innovating spirit and social responsibility. We reply on our customers, and the customers reply on us, we believe the win-win cooperation is the only way to be sustainable in the modern times.

DASCHEM, DASHINE

N.S.S.S PRINCIPLE FOR TEXTILE AUXILIARIES

N.S.S.S Principle is Dasgute contribution to the textile auxiliaries industry. We insist on Natural, Safe, Stable, Shine through all our routine productions and operations. By following the N.S.S.S principle, we have improved the product quality, production yield, commercial efficiency, service standard, as well as fastened the relationship with our customers all over the world.

N.S.S.S Principle is not only a stipulation that restricts the company activities, but also a commitment to the society and human beings which to protect and create a better environment for the future generations.
