

**XTR 溢多利**  
**Desizing En-  
zymes**

## Textile Enzyme

The product can be applied in the desizing process of fabrics sized with starch, starch derivatives, or blends of starch with other sizing chemicals. Desizing Enzymes has no negative effect on the textile fibers.

Product Manual

**XTR 溢多利**

# Desizing En- zymes

## Efficiency

- The product can be applied in the desizing process of fabrics sized with starch, starch derivatives, or blends of starch with other sizing chemicals.
- Desizing Enzymes has no negative effect on the textile fibers.

## Introduction

- Desizing Enzymes is a concentrated thermostable bacterial  $\alpha$ -amylase as a formulating base for fabric desizing. It is compatible with many other processing aids, including nonionic wetting agents and dispersants, lubricants etc.

## Features

- The fabric strength is maintained well and fiber damage is low.
- Wide range of application on PH and Temperature
