ABOUT

WHO WE ARE

For more than 30 years of dedication, DUNIATEX has grown exponentially to be the largest integrated textile industry in Indonesia.

Our company group manages a total of 6 subsidiaries which consist of 23 manufacturing facilities (primarily engaged in spinning, weaving, dyeing, and finishing) spanning across the nation. We were established to serve the local market and professionally managed to supply the international market demands within the textile business.

THROUGH YEARS OF HISTORY

DUNIATEX's tireless effort, strong commitment and high dedication to quality textile manufacturing have led the company into entering the spinning industry.

1974

DUNIATEX was founded in 1974 under the name of CV. DUNIATEX in Surakarta, operating primarily in the textile finishing industry.

1988

DUNIATEX acquired PT. Wijayatex, a woven textile company. The two companies then decided to unite and merge into one as PT. DUNIATEX in 1988.

1992

DUNIATEX took over PT. Damaitex, a textile finishing company located in Semarang.

1998

DUNIATEX expanded the weaving operations in 1998 by establishing PT. Dunia Sandang Abadi and PT. Delta Merlin Dunia Tekstil, initiating new businesses in the spinning industry.

2006

PT. Delta Dunia Textile was established. The companies were operating with a capacity of around 450.000 spinning machine.

2003

In 2003, **DUNIATEX expanded their business and established PT. Delta Merlin Sandang Textile** a spinning industry factory.

2010

DUNIATEX continued their expansion in the spinning industry with the establishment of PT. Delta Dunia Sandang Tekstil in Demak.

MORE ABOUT OUR **FACTORY & LABORATORY**

DUNIATEX's objective and orientation aims to: attain the most reputable name as the nation's strongest textile manufacturer, become the world leader on its behalf as well as the largest textile company in Indonesia.

In order to prevail in a highly competitive world of textile industry; a company is required to establish strategy in delivering products with premium quality.

In the aspect of production process, DUNIATEX is strengthened by the most advanced and modern technology within its laboratory equipment.

Not only DUNIATEX pursues to triumph as a market survivor, but also to become the world leader in textile industry.

Thus, through years of manufacturing excellence, DUNIATEX provides nothing but the best quality of products for consumers.

OUR PHILOSOPHY

VISION & MISSION

VALUES

WHY US

02

OUR VISION

To become the leading textile industry in the world by providing best quality of products and services.

OUR MISSION

- To deliver the best quality of products and services to its consumers.
- To provide a friendly, proactive, and accurate delivery of products and services.
- To perform and maintain a conducive working environment in which it contributes to the welfare of company's development and sustainability.
- To work with passion and puts high value on consumers by growing together in creating enhanced solution.
- To sustain empowerment in human relations within the working environment thus providing them with valuable opportunities: to grow on a personal level, to foster their ability, to reach their full potential.

OUR CORE VALUES

DUNIATEX focuses on consumer experience by identifying any problems that arise and yielding constructive solutions. By emphasizing a detail-oriented work ethic to be an integral part of our manufacturing production, it helps us maintain a higher level of effectiveness.

Our team of committed workers strives to improve the operational performance by enhancing a more reliable service for the satisfaction of the overall consumer journey. Therefore, high-quality products will be efficiently provided to end consumers through our manufacturing excellence.

REASONS TO CHOOSE **WHY US**

DUNIATEX maintains internal stability of prompt distribution, consistent quality, consumer satisfaction, and fair pricing.

By achieving ISO & OEKO-Tex certifications, DUNIATEX has gained quality assurance in the manufacturing developments such as factory expansion, spindle quantity elevation (up to 1.9 million spindles), and annual growth of production capacity (up to 600 million meters of greige fabric).

Through years of experience managed by 40,000 well-trained laborers, DUNIATEX continues to strive for excellence in fulfilling market demands on much broader aspects - from quality enhancement, product innovation, workplace fairness treatment, to green initiatives implementation. For our global expansion journey, we have extended our reach of exporting goods into overseas markets across major continents: Asia, Europe, Africa, and the Americas.

ABOUT
SPINNING

Spinning industry produces raw white yarn from high quality fiber into weaving or knitting yarn.

Through series of experience and perseverance, DUNIATEX has become the biggest spinning mills in Indonesia with spindle quantity up to 1.5 million. This is our way to fulfill our vision, which is to become the world leader in textile industry.

There are three types of spinning technique: Ring Spun, Doubling, and Open End.

The materials produced in the spinning process can be found as follows:

RING SPUN

Cotton Combed
Cotton Carded
Viscose (Rayon)
Polyester
Polyester / Cotton
Polyester / Viscose
Cotton / Viscose
Cotton / Modal
Modal
Melange
Slub
CSY (Core Spun Yarn)

ABOUT
WEAVING

The weaving industry weaves yarns to produce raw fabric (greige). This industry forms an important link in the chain of textile manufacturer.

To construct a strong foundation in textile manufacturing in Indonesia, DUNIATEX has established and developed more than 11 weaving industries and it makes DUNIATEX to be the biggest weaving industries in Indonesia.

Our production capacity for shuttle looms around 20 million meter/month and for air jet loom around 40 million meter/month.

The materials produced in the weaving process can be found as follows :

GREIGE

Cotton Combed	Yarn Combination
Cotton Carded	Polymicro
Viscose (Rayon)	Filament
Polyester	DTY (Drawn Textured Yarn)
Polyester / Cotton	Spandex
Polyester / Viscose	

ABOUT
KNITTING

Knitting process transforms yarn into knitted fabric. This fabric's property has a higher flexibility and readiness to be constructed into smaller pieces.

By the end of 2014, DUNIATEX GROUP believes that in order to provide manufacturing excellence for wider consumers, we have increasingly intensified our operational expansion toward the knitting facility. Therefore, we thrived in the ability to forge our own path in becoming the leading and trusted knitting textile industries in Indonesia.

The yarn used as a feedstock is among the best quality of yarn that DUNIATEX GROUP produces. Currently, our knitting facility is at the stage of development undertaken by trusted resources.

Knitting produces two types of greige materials: Single Knit and Double Knit.

The materials produced in the knitting process can be found as follows :

SINGLE KNIT	DOUBLE KNIT
Cotton Combed	Cotton Combed
Cotton Carded	Cotton Carded
Polyester	Polyester
Polyester / Cotton	Polyester / Cotton
Lacoste	Hyget
Baby Terry	Lotto
Jersey	Scuba
	Dry-fit Series
	Poly Spandex
	Waffle
	Rib Knitting

ABOUT

DYEING & FINISHING

Dyeing and Finishing will be the final process in the textile industry, processing raw fabric to produce finished clothes to be further processed in garment industry.

After the raw fabrics undergo singeing, bleaching, and dyeing processes, later on they will be dried and exposed to a process called chemical finishing. This is where DUNIATEX has established an effective strategy in customizing the final fabric process.

The dyeing and finishing facilities in DUNIATEX are managed by highly professional workers and equipped with stenter and jet dyeing machine made in Japan, Taiwan, and China.

The materials produced in the dyeing and finishing processes can be found as follows :

READY FOR PRINTING & DYEING

Cotton Combed
Cotton Carded
Viscose (Rayon)

SPECIAL FINISHING

Anti Micro-bacterial
Wrinkle Free
Blood Resistant
Easy Care / Easy to Iron
Soil Release
Water Repellent

FABRIC MATERIALS

Cotton Combed	Yarn Combination
Cotton Carded	Polymicro
Viscose (Rayon)	Filament
Polyester	DTY (Drawn Textured Yarn)
Polyester / Cotton	Spandex
Polyester / Viscose	

ABOUT **PRINTING**

Printing quality finished fabric according to pre-determined designs. The material used contains natural fiber and is supported by modern printing machines.

In order to realize the company's vision, DUNIATEX is committed to continuously innovating and becoming the largest integrated textile industry in Indonesia.

For this reason, in 2018 we started working in industrial printing. We print high-quality finished fabric according to pre-determined designs.

The material we use contains natural fiber such as 100% cotton, 100% rayon, or a mixture of cotton polyester and polyester rayon.

DUNIATEX is facilitated with state-of-the-art printing machineries from European, Japanese & Chinese technology, which is fully operated by design & production experts - thus, we always strive to provide the best for consumers.

DUNIATEX printing facility has 2 types of machine to produce printed fabrics, flat print and rotary print. Flat print is mainly used to produce bed sheet, meanwhile rotary is mainly used for fashion fabric.

The materials produced in the printing process can be found as follows :

PRINTING

Bed Sheet
Fashion (Plat, Twill, Dobby)
Sarung

ABOUT **DENIM**

Denim is timeless. It is a type of fabric that is universally favored and commonly worn by diverse communities.

DUNIATEX GROUP gears toward the denim industry as it is anticipated for its growth in the industrial market. In hopes to accomplish our dream of becoming the largest integrated textile company in Indonesia.

The process of denim creation is similar to the process of weaving other fabrics, except at the beginning of preparation, it requires to go through the indigo process (thread coloring).

The types of raw materials we use to make denim fabrics are cotton, rayon, spandex, polyester and slub yarn.

Currently, the type of Oz denim that we produce ranges from 4.5 Oz to 13.5 Oz with 4 basic types of color: Blue, Blue-Black, Black-Blue, and Black.

With the quality of our qualified resources and sophisticated machinery, we are able to reach a production capacity of 1 million yards / month and we ensure to provide the best quality for our potential consumers.

The materials produced in the denim process can be found as follows :

DENIM

Rigid (Non-Stretch)
Stretch
Washed Denim Fabrics

ABOUT

UNIFORM & SPORTSWEAR

Let us gladly introduce you to our manufacturing facility in uniform and sportswear. Here, we combine our consumer's request with variety of comfortable material to help them visualize their ideal uniform.

We customize consumer's needs and combine with the best quality of the stitches, embroidery, printing, and color choices.

Our apparel customization specialty consist of numerous sectors, namely security, outsourcing, hospitality, corporation, promotional, and active wear. For your uniform needs, the color and material selections are made on demand which caters to any consumer's request.

The end products produced in the uniform & sportswear process can be found as follows :

UNIFORM & SPORTSWEAR

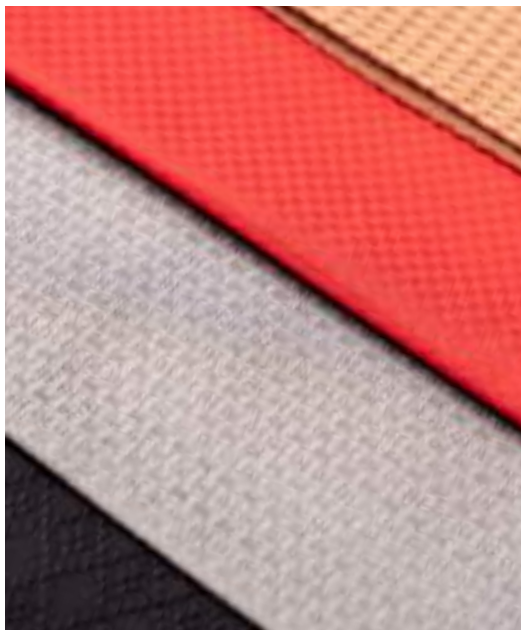

Hospital Attires
Dry-fit Apparel

Taekwondo Outfits
Agency Shirts
