

World of Textiles

Where it all began..

Who we are:

Aleppo, the oldest city in the world. Where main textiles were passed through or from. The founder of Oulabitex Ahmad Oulabi has began his journey of perfecting weaving and knitting fabric in the city of textiles. As the company grew the style and experience has surfaced through his sons and carried on by the next generation. With the family's enthusiasm, team work and effort expansion went underway to bring the company to the international standard. Unfortunately, after the terrible situation in Syria. The shareholder of the company has established a new company in Cairo finding new opportunities to its international hub. We are today as Grandsons of the Textile family expanding, developing and designing products that consumers can depend on.

New Facilities in Egypt

We have carried on our journey in Egypt starting off, with our new weaving facility producing high standard fabric to our Preparation, Printing, Dying, Finishing factory. Our aim is to become one of the major suppliers of textiles products for our customers. At top quality. Vertical and Horizontal expansion is under way.
