Unit:MM

3D Rendering

We offer 3D rendering services for design sketches and work with most 2D & 3D formats.

DFM Assessment

Make sure your design is ready for full-scale production with a DFM assessment from our senior engineers. We will highlight areas of concern and make recommendations based on our findings. Including DFM considerations at an early stage in the design process could ultimately save you time.

Mold-Flow Analysis

Molding simulation software to help identify potential production issues and, in turn, optimise the mold design and manufacturing process.

Design Confidentiality

We operate a company wide non-disclosure policy. Send us your NDA and let's get started.

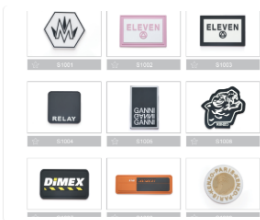

Design team

Professional and experienced designers for customers inquiry , No matter buyer provide original samples or design sheet ,will provide the 3D design sheet to buyer .

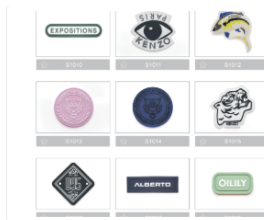

Production team

It has many die-casting machines imported from Japan,Rapid casting speed and high quality It has 4 precision carving machines,more precise carving, more detailed processing Technicians with years of experience in production and management.The production cycle is short and the product pass rate is high
