

Brand	Appearance	Application characteristics	Content	PH(10%)
Formaldehyde free fixing agent FC-E	Slight yellow to orange red viscose liquid	Washing fastness foot fixing agent, shallow water	50%	4 ~ 7
Formaldehyde free fixing agent FC-RG	Slight yellow to orange red viscose liquid	High concentration, high performance price ratio	50%	4 ~ 7
Formaldehyde free fixing agent FC-W	Slight yellow to orange red viscose liquid	High concentration of hydrophilic foot fixing agent, shallow water, suction effect	52%	4 ~ 7
Multi-functional fixing agent FC-C	Slight yellow to brown viscose liquid	High concentration, multi-functional fixing agent	72%±1	7 ~ 10
High concentrated green fixing agent FN-B	Light yellow to yellow liquid	Blue color special fixing agent, but also can improve the fastness to perspiration	70%±1	6 ~ 9
High concentrated red light elimination fixing agent FN-KD	Light yellow liquid	Excellent effect of red light elimination	75%±1	6 ~ 9
Formaldehyde free fixing agent FN-010/020/030	Light yellow liquid	Low color change and low yellow change have very little influence on the fastness to sunlight	35% ~ 50%	4 ~ 7
Aldehyde free graft modifier DE	Light yellow liquid	Free aldehyde, The activity of high yield garment dyeing agent and then, without losing the elastic	50%	4 ~ 7
High concentration of cross-linking agent FN-E	Light yellow liquid	Long car repair paint color change color crosslinking agent	60%	4 ~ 7
Brightening agent for wool 100A	Light yellow liquid	Use silicone oil to improve gloss and smooth feel of silicone oil	/	6 ~ 8
Raw material of Wrinkle free lubricant in bath 2600BN	White powder	Anti crease agent in bath, raw material of Wrinkle free lubricant in bath	100%	/
Anionic/Cationic/Non-ionicPAM	White powder	The thickening of different ionic products, the dispersion of the work system, the dyeing wastewater flocculation, precipitation treatment, etc.	/	/
