Qingdao Sunle Material Technology Co., Ltd

## COMPANY INTRODUCTION

Established in 2000, Qingdao Sunle Material Technology Co., Ltd is a professional supplier specialized in research and development, production and sales of textile auxiliaries. With a wide range of products, our company is able to meet all the demands of textile dyeing and printing industry. So far, our sales network covers all the domestic market, also we've exported our products to Bangladesh, India, Pakistan and Vietnam. By means of good quality products and excellent after-sales service, our company enjoys a good reputation in the industry.

Owning a professional technical team and advanced R&D Center, our company also works closely with Qingdao University of Science and Technology to develop a series of cutting-edge products by the aid of advanced technology. We've established stringent quality control process to make sure product quality and passed ISO9001 quality management system certification. Moreover, our company has attached great importance to sustainable development of environmental protection and achieved the goal of zero emission of waste water, gas and residue.

Following the trends of textile dyeing and printing industry, we'll always strive to deliver our customers best solution of textile auxiliaries.

## Products

| PRODUCT NAME  |
|---|
| Scouring agent powder SL-400  |
| Scouring agent powder SL-500E                                       |
| Scouring agent LF-40 (used in conjunction with the scouring enzyme) |
| Scouring agent LF-66 (used for dye vat)                             |
| Scouring agent LF-70 (especially used for knitted fabric)           |
| Scouring agent LF-75 (used for cold pad-batch)                      |
| Scouring agent LF-77 (used for cold pad-batch)                      |
| Oil removal agent RM-25   |
| Oil and scale removal agent RM-09                                   |
| Wax removal agent   |
| Oligomer removal agent  |
| Low temperature pretreatment agent                                  |

## PRODUCT NAME

Alkali Substitute Agent

Anti-staining soaping agent F-303

Acid soaping agent 2210

Soaping agent 2200

PH value regulator

High temperature leveling agent

Thickening agent

Binder N-180

Binder N-168

Wet rubbing fastness improver

Disperse dye active agent D-191

Solubilizer (in place of urea)

## PRODUCT NAME

Stiffening agent O6conc

Stiffening agent 805

Thickness increasing finishing agent M-10

Thickness increasing finishing agent SL-108

Cotton feel finishing agent SL-808

Softener flake R-05

Softener flake R-08

Fluffing agent R-071

Greasy feel and brightness finishing agent

Elasticity finishing agent

Weighting agent

Anti-pilling agent SL-6110
