# Neutral Cellulase for Washing

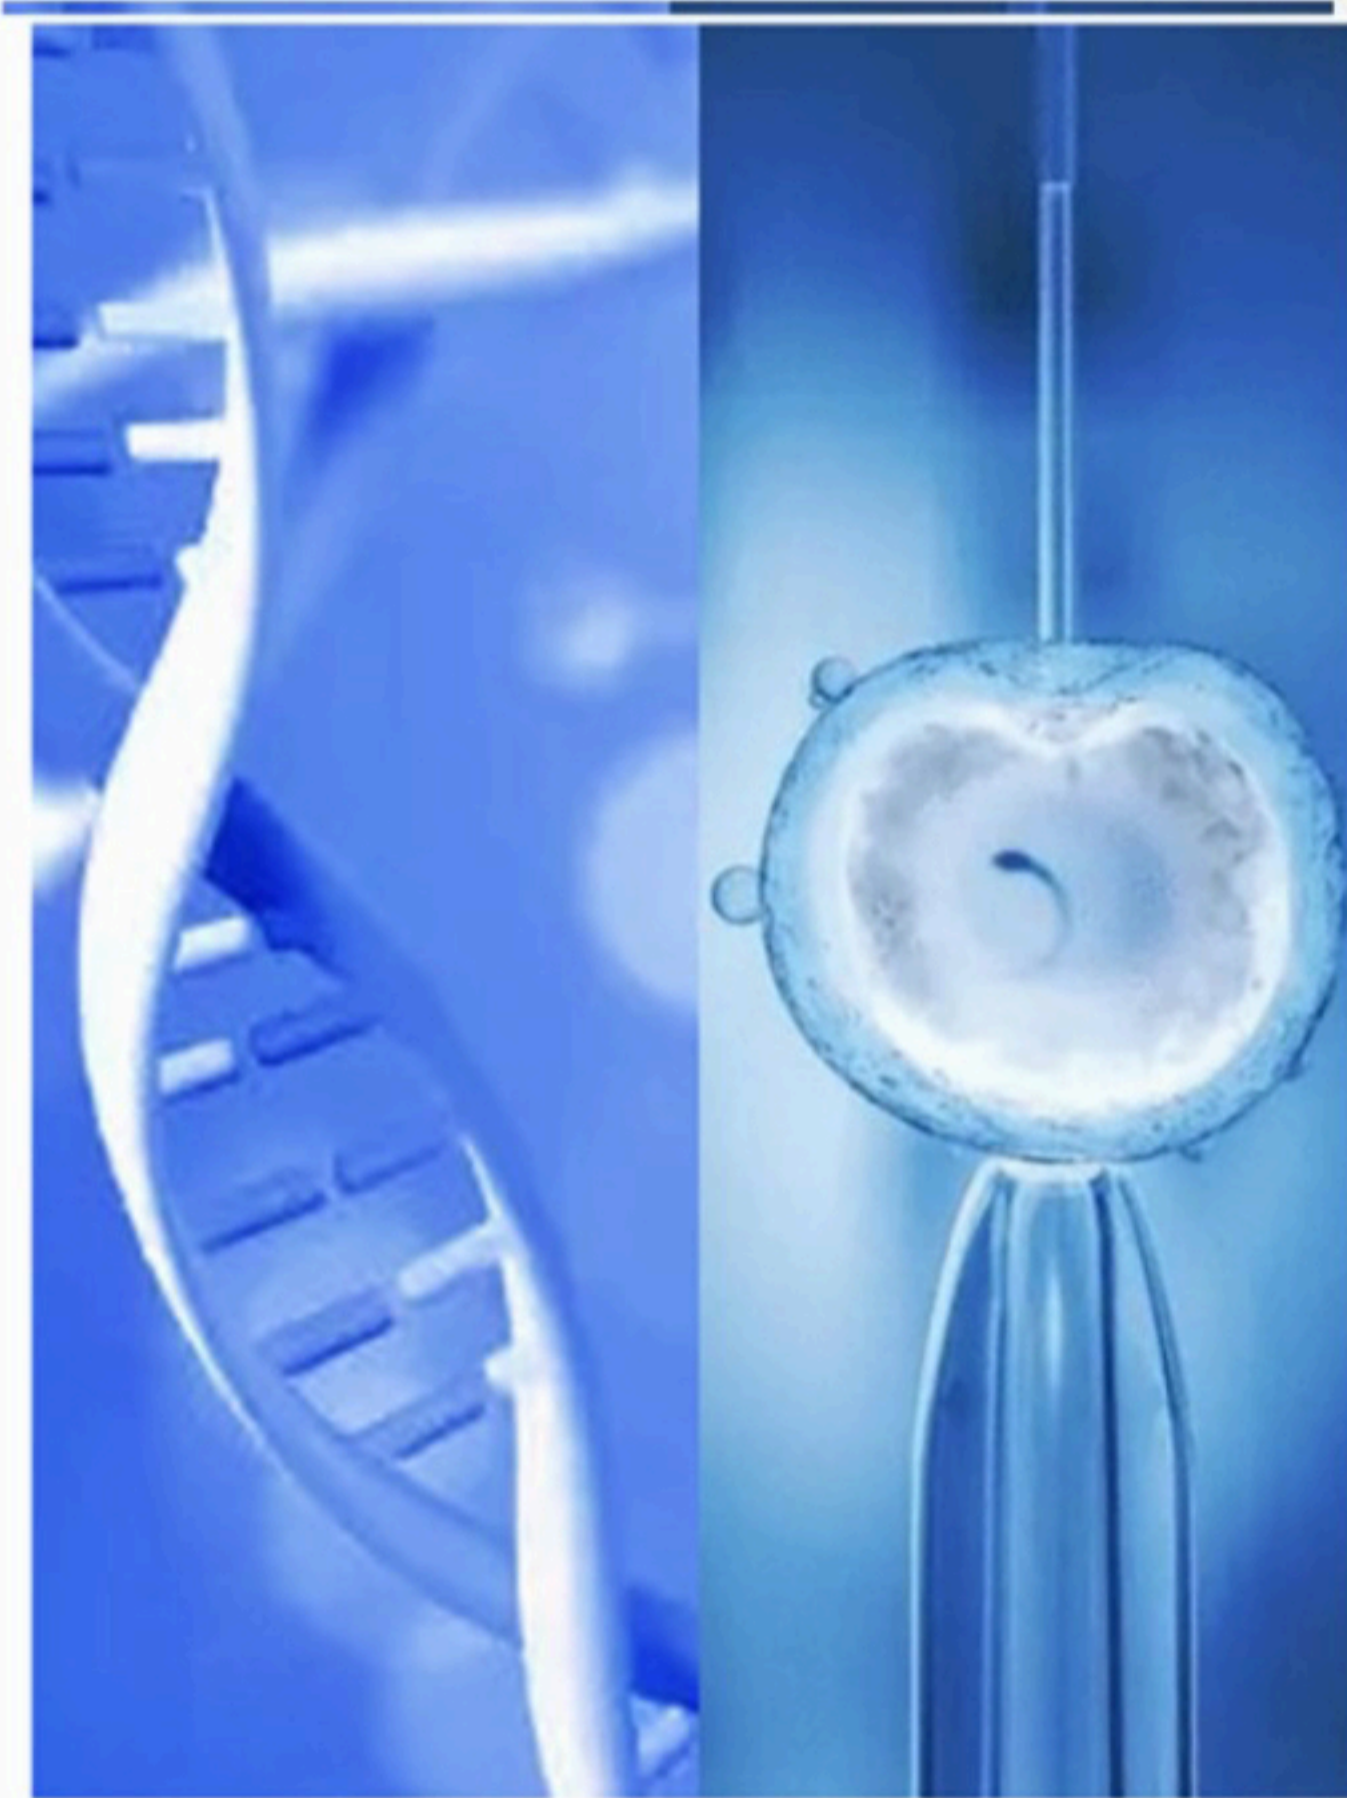

## Efficiency

- It is recommended for formulations for denim and garments washing.
- Due to its high concentration level, Enzymes for washing provides flexibility to make formulations.
- Formulated products with Enzymes for washing offers outstanding efficiency and benefits for denim washing.

## Introduction

- Enzymes for washing is a neutral cellulase preparation produced using a genetically engineered strain. The preparation is efficient in the modification of cellulosic material and especially suitable for formulations.

## Features

- Enzymes for washing is a highly concentrated & neutral cellulase preparation.
