Supplier Identification:

SARAH DESIGNS(BD) always identify new suppliers world-wide based on their product range, financial status, infrastructure, and environmental control, adherence to labor laws, manpower and efficiency of management , Information & Technological support. Sarah Designs(BD) continuously update information on new manufactures and new products. Information pertaining to new varieties of fabric, accessories, and new technology and quota availability are also updated.

ABOUT US

Factory Evaluation: We take an extra step to source the most appropriate vendor for our customers. Before selection we thoroughly evaluate the Factory on the basis of the following assessment:

- » Factory design
- » Financial performance
- » Factory equipment & machinery
- » Factory productivity
- » Quota export performance
- » Prevalent working procedures
- » Factory past performance
- » Technical competency
- » Factory personnel competency
- » Factory reputation
- » Level of professionalism
- »» Logistic Technological Support

We have formulated a Factory Evaluation Form: “**KFE Form**” which is filled out for every factory and then based on the physical and financial assessment includes creation of a rating grade to the factory. This rating grade can determine the quantity of Garments it can manufacture for Sarah Designs(BD) as well as whether it has adequate production capacity. These services can be further extended in locally reliable fabric sources, dyers and printers which ultimately promote quality of merchandise. This is an important process as no factory should be over booked, which causes delays in delivery and impacts production quality negatively. Factory assessments are an ongoing process. Sarah Designs(BD) is constantly investing time and effort in finding new factories which can meet the requirements of clients in terms of fashion and price.

ABOUT US

Sampling

Samples are developed to suit the season's colors, fabric and style based on our buyer's requirements. Any number of sales man samples is made as per the buyers requirements and courier them directly to the buyers. By offering this crucial service, we assist our buyers marketing efforts in their own country by giving them an edge over others.

Order execution and Quality Control : (Quality Management)

Orders are closely monitored from sampling to shipment. Status on sampling, production and shipment are transmitted to buyers regularly. We maintain a pro-active approach towards identification of problem areas and corrective measures are taken immediately to ensure timely deliveries. Our quality monitoring system pertaining to production has four stages as explained below :

Pre Production Check (PPC)

Risks are reduced by checking material components, accessories / user manuals etc. at this stage itself.

Initial Production Check (IPC)

First finished products are checked against buyer's specification and prototype sample. Deviations are identified and brought out for correction.

During Production Check (DPC)

Inspection during production is carried out to check and verify that the initial discrepancies have been rectified and to ensure the average quality standard of production runs.

Final Random Inspection (FIR)

Final random inspection is carried out when the total consignment is packed and ready for shipment. FRI is performed according to the International Inspection Standards.

The detailed physical inspection of the samples selected at random is based on specifications of the buyers and it covers the criteria such as design / style, shrinkage, accessories, appearance, markings, color, labeling, material, assortments, workmanship, measurements, packing etc.

ABOUT US

Status Reporting

Status report based on the multi-state inspections is transmitted to the buyers by fax or Email. Production progress is analyzed in relation to the delivery terms and suitable course of actions taken to ensure goods are delivered in time. The consignment is allowed for shipment if only it is up to the buyers required standard.

Container Stuffing and Loading Supervision

An identification of the goods during the loading is made to ensure that only the inspected goods are being stuffed without getting mixed up with the un-inspected goods.

Documentation and Shipping Co-ordination

Shipping documents are checked as per the buyers instruction and the copy documents are sent to the buyers well in advance of the shipment to avoid any discrepancy.

Laboratory Testing

Laboratories are an extremely valuable component of our services and also facilitate the manufacturer – exporters to transact their business with least quality risk. Laboratory services includes :

Fabric : Construction particulars (counts, constructions and weight), Strength, Measurement and Seam performance.

Analysis : Flammability, Dimensional Stability (Shrinkage) to washing / dry cleaning, Appearance after washing /dry cleaning, Fiber analysis, etc.

Color Fastness: Color fastness to washing, Perspiration, Light, Rubbing, Bleaching, Dry cleaning, Organic Solvents, Hot pressing, etc. Dyes & Pigment tests are also carried out.

Garment: Dimensional Stability to washing / dry cleaning, Appearance after washing / dry cleaning is tested.
