

MIZUDA GROUP

Building the “Zero-Waste Cities”
Municipal Solid Waste Integrated
Service Provider

Founding in

1993

Since its founding in June 1993 as a small textile factory, Mizuda Group has constantly transformed, modernized and blazed new trails with a pioneering spirit. It has grown into a large private enterprise group with environmental protection & waste management as its backbone, and financial investment & health and leisure industry as its two wings. By the end of 2019, the Group has 16 core first-tier subsidiaries (1 listed company), 176 second-tier subsidiaries, and 3 closely-affiliated investment-holding companies that have combined to form a network of corporate organizations. Among them, there are 8 National High-tech Enterprises, 1 National Technical Center, and 1 Provincial High-tech R&D Centers.

INDUSTRIAL DISTRIBUTION

DEVELOPMENT PROCESS

Stage one – Start-up (1993 – 2004)

Beginning with the creation of Huzhou Textile Factory, the main features of this stage include: taking advantage of the historic opportunity of reform and opening up; the rapid growth of the main business of textile printing and dyeing; the launch of industrial integration; continuous improvement of technology; the acquisition & development of qualified talent; as well as, the advancement of a programmatic and systematic corporate culture.

Stage two – Diversified Operations (2004 – 2014)

Beginning with the IPO listing of Zhejiang Mizuda Dyeing and Printing Group Co., Ltd., the establishment of Mizuda Group, and the execution of the "Go Global Development Strategy Seminar", the main features of this stage include: seizing on the industrial development trends of environmental protection and real estate development; significantly enhancing capital strength; expanding on environmental protection and energy resources; solidly promoting transformation and modernization; and launching a growth strategy to accelerate the development of diversified operations.

Stage three – Innovative Development (2015 – future)

Beginning with the Mizuda Development Strategy Seminar at Siming Lake, Ningbo, by closely adhering to the development pace of the times and seizing on the two major development opportunities of comprehensive reform and dynamic economic transformation, the Company has strengthened its institutional systems and launched a new era of industrial development and cultural enrichment.

 **Printing&Dyeing Technology**

Zhejiang Mizuda Textile Printing and Dyeing Technology Co., Ltd. is mainly engaged in product design & cotton manufacturing, as well as jacquard fabric printing and dyeing. The Company's 150,000 m2 factory buildings occupy 467 acres of land, making it one of China's largest textile printing and dyeing production bases, as well as one of the top 20 players in China's printing and dyeing industry. The company has independently developed emboss printing technology, cold pad batch dyeing technology, multi-functional fabric coating finishing technology, wet-steam dyeing technology, and other core technologies. The company's annual production capacity has reached 100 million meters, with sales extending across more than 60 countries.

The company's quality management and environmental management systems have earned the ISO9001 Quality Management System certification, ISO14001 Environmental Management System certification, Eco-textile Standard certification, Intellectual Property Management System certification, Intertek-CCFA Product Carbon Footprint certification, and White-List Management System certification.
