

Dodhia Group has grown rapidly in the past four decades to become one of the leading manufacturers of Yarns and Chemicals in India. We have successfully carved out a niche in the specialty yarns segment with an unparalleled and extensive range of integrated textile products.

The group has its manufacturing locations at Maharashtra and Silvassa with its marketing offices located with adequate infrastructure at Mumbai for overseeing its domestic and export operations.

Our Quality management system is top-notch and our approach is highly customer-oriented with a view to evolve consistently and with commitment to all three P's - products, process and people. It is our values, consequently, that create value for you. We are a close-knit family-owned business with a professional approach and a corporate culture that allows us to set industry benchmarks.

The organization is managed by an experienced, motivated and eloquent Board of Directors in conjunction with a highly qualified network of professionals. The vision of the Dodhia group is to be a definitive market leader both in India and abroad by the year 2020. Authentic R&D, proactive marketing and sales, a customer-centred approach, human resources that tap the best potential, and social and environmental accountability is how we plan to get there.

Specialty Chemicals and Pharma Intermediates

What drives us?

Excellence. We are well-recognized as a leader in the integrated textile industry. We achieved this through consistency in quality and peak production output. Every plant is equipped with highly automated and top-notch technology, which in combination with committed leadership, leads an assurance of the best goods and services being rendered to you.

What is our vision?

Customer satisfaction. This is achieved through quality, performance, collective R&D efforts, and cost effectiveness. Competitive prices and the highest of standards are what we currently provide and continually aspire to. With human resources deployed in a manner that achieves the highest potential and a serious concern for the environment, we provide holistic products and services.

What are the values at our core?

Moving forward as a team in the best interest of our consumers. We are committed to conserving the environment and adopt advanced technologies to do so. As the textile market deregulates and the global population increases, we look forward to confidently meeting worldwide needs. We honour our customers' expectations with the highest quality and durability. We do all this owing to a commendable team. Our workers are highly motivated and undergo regular training. People are central to our endeavours at Dodhia Group. Owing to a flat organizational structure, our decision-making is prompt in response to market changes. Our spirit of collaboration is inclusive and progressive. We keep our clients, vendors, employees and research -- which established our field and created our market -- close to heart.

ALLIED BUSINESS

Kemox Corporation is one of the leading manufacturers of textile speciality chemicals, leather chemicals, Oil field chemicals, paper industry chemicals and other performance based products. Our R&D team - in close collaboration with the clients- develop quality, high performance and cost-effective chemical products for their markets.

Our strategy for growth and success has been to reinforce our core businesses by continually expanding, upgrading, diversifying and innovating to develop new molecules. We invest in and conduct intensive R&D backed by extensive market research for in-depth understanding of the market needs.

DODHIA
CHEMTEX PVT. LTD.

At Dodhia Chem-Tex Pvt. Ltd., our specialty and pharmaceutical research centre, we firmly believe that change is the only constant and so we innovate perpetually. With a strong focus on R&D, backed by a rigid and stringent quality control, we have built a strong customer friendly culture. Our emphasis on pre- and post-sales service and the penchant for customer satisfaction has earned us a strong base, which has been ever-growing.

We have a research scientist on board who brings the much-needed R&D factor to the company. 'Perpetual innovation is the only critical parameter and a barometer to leadership' is what we believe.
