About

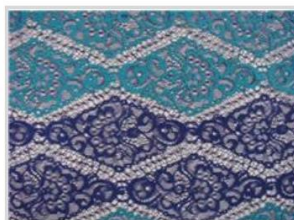

ABOUT

Founded on December 2003, Changzhou Great Knitting Mill is a specialized warp knitting factory, professionally on R&D, manufacture and sales of high quality lace fabrics. Our lace products are widely used in ladies fashion and lingerie markets.

Our mill has imported several cutting-edge high-speed computer jacquard machines from German Karl Mayer, including digital jacquard knitting machine, digital multi-bar knitting machine and digital jacquard multi-bar knitting machine. The advanced equipment and world-leading production technology are our advantages to face industry upgrading and to realize the centralized management. Our business model is given priority to independent R&D, supplemented by taking market orders and processing with supplied samples. Driven by the “two wheels” of new product development and new customer development, our mill mainly produces various lace fabrics with chic design concept, high quality materials and strong independent pricing powers, which are very popular among mid-high end customer markets.

After years' of efforts, the mill has won certain competitive power in the lace industry. With high potential of growth and excellent anti-risk ability, Great Knitting Mill is ready to create a better future!
