

ABOUT US

Fashiontex International Limited was situated in Shengze town, Wujiang District, Suzhou, with only an hour's ride to Shanghai. It is a science and technology enterprise majorly in textile, with integration of research and developing, produce and trade. Its annual sales volume reached over 200 million Yuan, with 80% occupied by exportation, 20% for the domestic market, its major export markets ranged in over 20 countries and regions, from Europe, America, Southeast Asia, South America, Middle East, etc.

The enterprise's major products are the middle and high level textile fabrics in 3 series: the polyester imitated silk fabrics for fashion women's wear (like chiffon, satin, yoryu and so on), the fabrics for men's sportswear (like polyester pongee, micro fiber, imitated memory fabrics, etc.) and the home textile fabrics for home and hotels (like blackout fabrics, suede, etc.)

The company owns 600 sets of advanced water jet looms and its corollary equipment, 500 twisting machines and a perfect quality control team, offering the quality control from raw material, weave to fabric finishing, also the best quality for clients. Meanwhile, we have a professional product developing and researching team which could forecast the popular trend of new products correctly, quickly design and develop the new products, and timely offer new products to clients.

The company insists on the developing road of "fashion, technology, green", adhere to the enterprise's culture of "people first", create a "easy, relax and harmonious working environment", foster "employees' assiduous and practical working attitude", constantly maintain a "confident and positive mentality", while "keep pace with the times", reach an effective and innovative style of work; persevere in the developing method of "customer-centric", with the principles of "business integrity and service paramount". In accordance with clients' demands, do the best to reach the four basic points of "quality, delivery, cost and new products", devoting to win-win situation on the basis of realizing clients' value.

RESEARCH & DEVELOPMENT

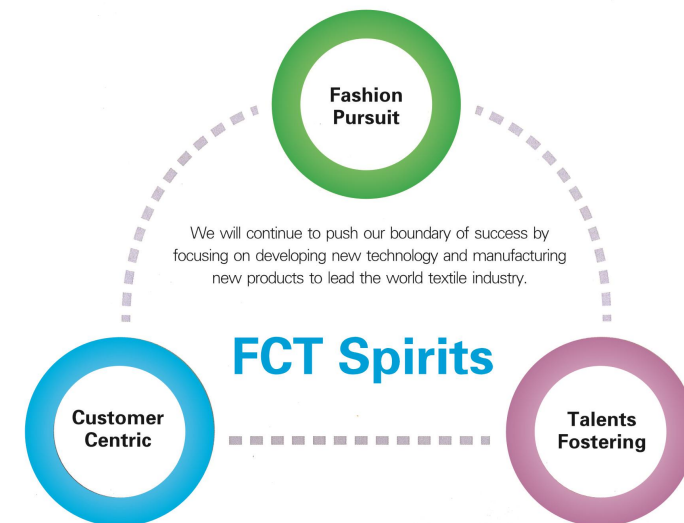

To put the highest priority on humans and environment and as a part of Customers' satisfaction, Fashiontex operates a R&D center for new products and a new technology development, and a research lab to advance quality. Fashiontex's R&D represents the corporate spirit that endeavor its best ability to produce the high quality products for customers' satisfaction and Produce the environment friendly products.

R&D Center

- Develop china style dyeing by utilizing high-tech CAD/CAM equipment.
- Operate various kinds of test to develop new products and new technology.

Research Lab

- Analyze dyeing process defect by utilizing all kinds of test analyzing equipment.
- Conduct environment-friendly experiment research on industrial water and wastewater.

We will continue to push our boundary of success by focusing on developing new technology and manufacturing new products to lead the world textile industry.

We will put our utmost priority on the customer's satisfaction to realize the coexistence and co-prosperity with all the customers that participate in the process of purchasing-manufacturing-Sales.

In order to train the potential brains for the future textile industry, the company will value the each member's autonomy and originality.

PROCESS

The preparation dramatically increases weaving efficiency through a high-speed weaving machine and prevents slub due to friction while weaving by enhancing yarn's convergence. Our weaving machines, such as water jet looms, create high quality of perfect fabrics to meet the customers' satisfaction. Then through accurate dyeing, precise processing coating and bonding, Fashiontex's processing puts its utmost effort to supply top quality products with various functions.

QUALITY CONTROL

Fashiontex purchase a lot of testing equipment, through quality management, improve brand image and customers' satisfaction, strengthen the concept of quality culture construction and the attitude of persistent pursuit of top quality. Management philosophy of high quality is the cornerstone to support the enterprise standing strongly in the market competition. Every meter fabric from Fashiontex is under the stringent quality control: from raw materials procurement, to finished fabrics inspection before entering warehouse, using the US four point standard for greige inspection, dyeing test, and finished product inspection to create a quality standard in textile industry.
