## LEADING IN MATERIAL SOLUTION

Since its establishment in Hangzhou, Zhejiang Province in 2005, the company has developed into a technology company specializing in special chemicals in the production process of textile dyeing and finishing, building materials and daily necessities after more than ten years of rapid development.

Combine the company's strengths and continuously develop innovative products, applications and solutions. Highly qualified professionals conduct product development, analysis and technical applications in state-of-the-art laboratories to meet the needs of the most modern production.

Application of advanced fine chemical technology, nanotechnology, polymer material technology, to provide customers with high value-added, environmentally friendly, safe products and the most cost-effective technical solutions.

Our products help to improve the quality, function and performance of textiles, dyes, building materials and daily chemicals, as well as cleaning and care products in different fields.

Always ahead of the market, meeting or exceeding customer expectations – these are the challenges we set for ourselves. Constant innovation, customer-oriented product development, providing customers with quality service - this is Putton.

## PRODUCT CENTER

There are hundreds kinds of products for choose ,it's including the comprehensive information about the products and technical solutions .

### Silicone Oil Series

A variety of silicone oil materials ,apply to all kinds of fabrics for hands feel finishing.
