## NEXT-GENERATION AUXILIARIES' SOLUTION FOR TEXTILE INDUSTRY

New automation equipment and new technology in the production of products, give you more efficient product experience and stable product quality.

Dongguan Dasen Textile Material CO., LTD is a manufacturer specialized in the development and production of various textile auxiliaries. For decades, Dasen has set the goal to develop and produce high-quality products with competitive prices and comprehensive services to our customers, by focusing on most of the areas of textile auxiliaries and providing professional and technical support. As a result, Dasen has become one of the most prominent manufacturers of softener flakes and silicone softener in China.

Dasen has complete production equipment, including analytical and laboratory-test equipment, which fully guaranteed the stability of Dasen's product quality. Dasen believes that high-quality products are the fundamental basis of Dasen's reputation, so Dasen has been following the slogan: assuring the quality of production process to ensure the final product quality; emphasizing innovation to keep continuous improvement.

Respecting knowledge, science, and talents are the management objective that Dasen has always been pursuing. Dasen not only owns an experienced research and development team but also has established cooperative relationships with leading domestic research institutions for research and develop hi-tech products jointly.

\*Pioneering on innovation, being faithful permanently, assuring high quality, providing comprehensive and sophisticated services, and managing long-term win-win cooperation\* has always served as the major business value of Dasen.
